Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisdictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

INTRODUCTION

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - March 1976

A record high of $1.357 1/ billion was paid out of Title XIX funds in March 1976, an increase of $180 million over February and $66 million above the previous monthly high recorded in January 1976. Average monthly payments for the year ending in March equalled $1.206 billion, an increase of 1.5 percent over the year ending in February.

Similarly, a record number of approximately 10 million recipients 2/ had vendor payments totalling $1.329 billion made in their behalf. Increases in recipients over February were highest among members of families with dependent children and other Title XIX recipients.

There were concurrently 329,831 medicaid eligibles enrolled in health maintenance organizations whose premiums totalling $9.8 million were paid out of Title XIX funds.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for March is as follows:

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	76.4	23.6
Aged 65 and over	21.7	13.8	7.9
Blindness	0.5	0.4	0.1
Permanently and totally disabled	13.9	10.8	3.1
Children under 21 in families	34.0	30.2	3.8
Adults in families with dependent children	22.8	21.0	1.7
Other Title XIX under 21	3.4	xxx	3.4
Other Title XIX age 21-64	3.7	xxx	3.7

1/ Includes payments of $2,906,580 for Vermont.

2/ Includes estimated recipient counts of 25,000 for Vermont and 169,165 for Washington which were furnished by the States. Recipient estimate for Wyoming was based on average payments per recipient from prior months. Pennsylvania recipient count was inflated to reflect prescribed drugs.

More than half (56.8 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other Title XIX recipients under 21 accounted for 37.4 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 21.7 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (23.7 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 7.9 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 19 percent (about half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (26.8 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	55.6	44.4
Aged 65 and over	34.4	10.7	23.7
Blindness	0.6	0.4	0.2
Permanently and totally disabled	26.8	17.3	9.5
Children under 21 in families	15.5	12.9	2.5
Adults in families with dependent children	16.4	14.3	2.1
Other Title XIX under 21	3.5	xxx	3.5
Other Title XIX age 21-64	3.0	xxx	3.0

Payments by Type of Service

Inpatient services comprised 69.9 percent of medical vendor payments in March; hospitals (32.6 percent), skilled nursing facilities (17.1 percent), and intermediate care facilities (20.2 percent). Record high amounts were expended for both hospitals and intermediate care facilities. The increase in monthly payments for the year ending in March was substantially higher for inpatient services (1.8 percent) than outpatient and other professional services (1.0 percent). Physicians' services and prescribed drugs accounted for 9.6 and 6.7 percent of the total payments.

Screening Services

During March 163,689 children (including 12,809 children reported by New York for February) were reported as screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-two percent of the children screened were six years of age or older. Fifty-two percent of the children screened had referrable conditions uncovered and 89.9 percent with such conditions uncovered were referred for diagnosis and treatment.

Annotations

1. The following definitions apply to symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no title XIX program and is excluded from the tabulations. Vermont did not submit a report for February and is excluded from the tabulations.

3. Washington and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables. Colorado reported recipients and payments by basis of eligibility only.

4. States do not always report premium or per capita payments into the SSA system for aged and disabled recipients separately. Payments reported under the aged category include payments for the disabled. There is variance from month to month in States reporting SSA and HMO premium payments because in some cases, such payments may be made less frequently than monthly (Table 1).

5. Pennsylvania recipients for prescribed drugs are not included in the tabulations. Payments for such services are reflected in Table 5 only. For New Hampshire, payments for medical transportation are reflected in Table 5 only. For Massachusetts, payments for intermediate care facility services for the mentally retarded represent January through March. Such data are available at the end of the quarter. Similarly, such payments for Rhode Island include December 1975 and January 1976.

6. For New York, recipient and payment data by basis of eligibility and maintenance status were estimated by the State.

7. In addition to Vermont, Colorado, Washington, and Wyoming; Massachusetts, Nevada and Pennsylvania are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table II. Pennsylvania did not differentiate other title XIX recipients by age and is excluded from Table 14.

8. In some States, two or more types of medical services may be grouped together under one class, such as Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and South Carolina, where skilled nursing facility services include payments to State mental institutions.

9. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9. For the current month, however, Michigan's expenditures exclude accounting adjustments of $72,990.

Annotations specific for Screening Tables 15-20

10. States omitted from tables either did not report on screening services for March 1976 or there were no individuals screened during the month. Screening data for New York represent February data which were excluded from the February publication.

11. California reported 90,805 individuals and Oregon reported 6,363 individuals receiving comprehensive physical examinations in addition to the screening data.

12. Data for Ohio, Illinois and Massachusetts are incomplete. For Rhode Island, data include 122 newborns, for whom payments are reflected in physicians' or hospital services.

13. Payments for screening services were not reported by Georgia, North Dakota, and Massachusetts and payments for Idaho, the Virgin Islands, Pennsylvania, Puerto Rico, Michigan, and Texas were not reported separately by age.

QUARTERLY HIGHLIGHTS
JANUARY-MARCH 1976

Payments made out of Title XIX funds reached $3.8 billion in the quarter ending March 1976 for an increase of 4.8 percent over the previous quarter and 14.2 percent over the same quarter in the previous year. Recipients in whose behalf medical vendor payments were made averaged 9.37 million persons per month, an increase of 2.9 percent over the previous quarter and 6.8 percent over the same quarter in the previous year.

Recipients of cash assistance under the program of Aid to Families with Dependent Children comprised 50.5 percent of the monthly caseload (4.7 million persons). Increases in recipients were observed for every eligibility category over the previous quarter. Non-cash assistance Medicaid recipients recorded a larger increase (5.3 percent) than cash-assistance recipients (2.2 percent). A reverse situation occurred in medical vendor payments with a larger increase for cash assistance recipients (6.5 percent) than non-cash recipients (3.4 percent).

Payments for inpatient services constituted 70.5 percent of the Medicaid dollar during the quarter and increased by 6 percent over the previous quarter. Among such services, intermediate care facilities registered the largest increases with 9.5 percent over the previous quarter and 34.3 percent over the same quarter in the previous year. Although there was an increase in payments over the previous quarter for skilled nursing services, there was a slight decrease over the same quarter in the previous year. Payments for outpatient and other professional services increased over the previous quarter at a lesser rate than inpatient. As shown in Table Q-1, the overall rate of increase in expenditures under the program has slowed. The 14.2 percent increase during the third quarter of fiscal year 1976 over the previous year is the lowest increase recorded since this monthly series began in 1974.

TABLE Q-1.--AMOUNTS OF MEDICAL VENDOR PAYMENTS UNDER TITLE XIX BY TYPE OF SERVICE
FOR THE QUARTERS ENDING MARCH 1975 THROUGH MARCH 1976

(In thousands)
